Course is required in your first year unless you have permission from course instructor and Chair.

***** A statistics or microeconomics course taken at another institution may be used to waive these required courses, at the discretion of the instructor or program chair. A waiver for the required course can only be approved by the faculty member responsible for teaching the required course or program chair. All waivers must be requested and approved before the end of the official drop/add date for the current semester. A graduate statistics or microeconomics course offered by another UM program, taken during the first year, may substitute for these required courses (see the college bulletin for details).

- 48 hours are required a minimum 30 hours must be Urban Planning courses
- Maximum 8 hours of Individual Study courses, including an independent thesis or professional project.
  NOTE: This means that if you choose the professional project or thesis option, a maximum of two additional individual study credits will be counted toward graduation.
