Master of Science in Architecture / University of Michigan

Intensive Research in an Emerging Practice Concentration

The Master of Science (M.S.) in Architecture degree is an intensive 3-term (12-month) post-professional academic program with a focus on design research. The degree concentrations include Design and Health (M.S. DH), Digital Technologies (M.S. DT), Material Systems (M.S. MS), and Conservation (M.S. C).

The course of study allows for interdisciplinary skill building and new knowledge integration in order to advance design expertise. With focused subject matter, the program develops participants' distincties in design thinking and entrepreneurial approaches to design practice. The academic program culminates with a faculty-directed design research project that frames problems relevant to their area concentrations.

The degree program capitalizes on the university's unique position as a premier research university with over 95 top-ranked departments. The university's breadth is integral to the concentrations' course of study.

Our degree is particularly appropriate for graduates with a B.Arch. or M.Arch. professional degree in architecture (or equivalent degrees in related fields). The M.S. enables graduates to pursue design research careers in the academy and/or leadership in expanded architectural practices.

Application Deadline: January 15, 2016
Start Date: July 2016
