

# A254 002—PROJECTION MODULE

**INFORMATION:** This studio drawing course focuses on the translation of three dimensional space into two dimensional representations in digital drawing, at the building and object scales. Methods of projection are explored to understand and expand their conventional use in architectural design. Orthographic, perspectival, and anamorphic projection may be explored. Though intended primarily for students considering a design-related career, it is open to students from any discipline wishing to improve their visual literacy.
